

I am writing concern tha tmy local translator for K-Love radio may be lost if the new implimentation of LPFM is put into effect. K-LOVE radio transmits a positive, clean, and family friendly broadcast of music and information shows. I value the broadcasts put forth by KLOVE and would greatly miss it.

KLOVE impacts the community positively with campaigns of giving and local jobs and brings hope to an otherwise dismal broadcast world.

The airwaves of Oregon are already filled by conglomerate trash stations out there broadcasting filth and music that can hardly be considered clean for public broadcasting.

KLOVE radio is a shining light of hope to and an alternative that may not otherwise be available.

KLOVE provides a service free of influence by advertisers and Corprate greed/influence.

Being a non-profit, 100% LISTENER supported station, they are in existance because the PUBLIC wants them. If the public did not WANT them around, they would not fund them. It should be obvious that removing such a station from teh airwaves my area would be a detriment and a slap in the face to those that support it.

Not only would the implimentation threaten the broadcast, it would be taking away a broadcast that is desired in the area, paid for by the listeners of the area, and replacing it with that which is not desired.

I hope that my opinion helps you in your decision and keeps stations such as KLOVe on the air in my area nd does not allow for LPFM stations to push them out of my radio.
